OK I'll get on the email request to Titliest but will send draft to you and Cindy before I send it.

Cindy told me not to include until we get OK so I am revising comment to say we'll send it later

**Subject:** RE: AVX

OK, I see that from the Ph III comments, I am sending an email to Titliest contact requesting their OK on sending the data to DEP and AVX for remedial considerations but I'm sure it'll be OK since AVX is liable.

If we have any significant input on boring log review, we should forward to DEP

Boring logs are included in the August IRA report but not all based on the plan view. However, there are some very high PID readings at the bottom of the peat layer (3,300 ppm in one). I'd have to search out the analytical data for the interval

to see if they sampled directly below the peat layer. Want me to do that? Let me know what else you would like me to do in the meantime please.

E-

Comment 8 in DEP 7/15/16 letter stated this. Have we seen boring logs?
